An online Web Development course by Angela Yu

PROJECTS

Digital Business Card Generator and Manager

Sep 2023 - Feb 2024

<https://digital-vcard.vercel.app>

Create and manage digital business cards effortlessly with the admin dashboard. Admins can add users' contact info, generating unique V-cards accessible via links and QR codes containing vcf data. Built with React, Node, Express, and MongoDB, the platform streamlines networking by digitizing business cards for seamless sharing and storage.

Use the link provided to access the admin dashboard.
Demo credentials:
Email: demo@gmail.com
Password: demo123

View the vcards through the link below:
<https://digital-vcard.vercel.app/vcard/{CompanyName}/{EmployeeID}>

Trythat.ai

Jul 2023 - Dec 2023

<https://www.trythat.ai>

Empower your property endeavors with instant access to vital registration data. This web application compiles comprehensive property listings for both commercial and residential buildings, facilitating lead generation for brokers. Developed during an internship with mentorship from senior developers, this industrial-grade project utilizes React, Node, Express, and MongoDB, hosted on AWS for seamless scalability and reliability.

TinDog

May 2022 - Jun 2022

<https://github.com/choukseaaryan/tindog>

A tinder knock-off website for practice purposes.

Hospital Management App

Mar 2022 - Apr 2022

<https://github.com/choukseaaryan/HospitalManagement>

An android application created to manage records of a hospital.
